TOXICOLOGY

SUBJECT INDEX

Volume 61 (1990)

A549 cells, Cd^{2+} cytotoxicity, glutathione (GSH), metallothionein (MT), Cd^{2+} accumulation, GSH kinetics, 195
anti-oestrogen, oestrogen, organ weights, hypothalamic-pituitary axis, uterus, liver, 185
aorta, metal, vasoconstriction, dogfish shark, cadmium, Cd^{2+}, Ni^{2+}, 275
atrazine, tridiphane, effect on pharmacokinetics, F344 male rats, 27

benomyl, carbendazim, DNA-synthesis inhibition, [^{3}H]thymidine incorporation, toxicity test, 161
beryllium chloride, microsomal enzymes inhibition, interaction with pentobarbital, interaction with zoxazolamine, 293
brain, convulsions, cyanide, α-ketoglutarate, calcium, GABA, 221
Bromkal 70-liver metabolism, pentabromo diphenyl ether, flame retardant, polychlorobiphenyl compounds, microsomes, cytochrome *P*-450, metabolic clearance rate, 259
Buehler test, contact sensitization, risk assessment, 91

cadmium, glomerulus, mesangial cell, proteoglycans, glutathione, nephrotoxicity, divalent metals, 119
cadmium, metal, vasoconstriction, aorta, dogfish shark, Cd^{2+}, Ni^{2+}, 275
cadmium mobilization, cadmium mobilization, chelating agents, pathology, 73
cadmium mobilization, chelating agents, pathology, cadmium mobilization, 73
calcium, convulsions, cyanide, α-ketoglutarate, GABA, brain, 221
carbendazim, benomyl, DNA-synthesis inhibition, [^{3}H]thymidine incorporation, toxicity test, 161
CCl_4, hepatic encephalopathy, phenylalanine, tyrosine, hyperammonemia, 241
Cd^{2+}, metal, vasoconstriction, aorta, dogfish shark, cadmium, Ni^{2+}, 275
Cd^{2+} accumulation, Cd^{2+} cytotoxicity, glutathione (GSH), metallothionein (MT), GSH kinetics, A549 cells, 195
Cd^{2+} cytotoxicity, glutathione (GSH), metallothionein (MT), Cd^{2+} accumulation, GSH kinetics, A549 cells, 195
cell death, plasma DNA, cytotoxicity, toxic agents, drugs, 283
chelating agents, cadmium mobilization, pathology, cadmium mobilization, 73
chicken, tri-*o*-cresyl phosphate, TOCP, metabolism, delayed neurotoxicity, 13
cholesterol side-chain cleavage, lindane (γ-HCH), steroidogenesis, reproductive adversity, hormone deficiency, 41
cocaine hepatotoxicity, liver slices, species comparison, human liver, pig liver, rabbit liver, rat liver and mouse liver, 171
cold-restraint, glutathione, stress, non-protein sulfhydryl content, 59
contact sensitization, Buehler test, risk assessment, 91
convulsions, cyanide, α-ketoglutarate, calcium, GABA, brain, 221
creatine kinase-B, toluene, subacute inhalation, γ-enolase, α-enolase, β-protein, 109
cyanide, convulsions, α-ketoglutarate, calcium, GABA, brain, 221
cytochrome *P*-450, ethylene oxide, prophyrin, heme, ferrochelatase, 1
cytochrome *P*-450, pentabromo diphenyl ether, flame retardant, Bromkal 70-liver metabolism, polychlorobiphenyl compounds, microsomes, metabolic clearance rate, 259
cytochrome *P*-450-dependent monooxygenase activities, 12-*O*-tetradecanoylphorbal 13-acetate, hepatoma cells (rat), tumour promoters, 147
cytotoxicity, plasma DNA, toxic agents, drugs, cell death, 283

delayed neurotoxicity, tri-*o*-cresyl phosphate, TOCP, chicken, metabolism, 13
diamide, hydroperoxides, superoxide dismutase, GSH-peroxidase, iron chelator, radical scavenger, 229
divalent metals, glomerulus, mesangial cell, proteoglycans, glutathione, nephrotoxicity, cadmium, 119
DNA-synthesis inhibition, benomyl, carbendazim, [^{3}H]thymidine incorporation, toxicity test, 161
dogfish shark, metal, vasoconstriction, aorta, cadmium, Cd^{2+}, Ni^{2+}, 275
drugs, plasma DNA, cytotoxicity, toxic agents, cell death, 283

effect on pharmacokinetics, tridiphane, atrazine, F344 male rats, 27
embryotoxicity, salicylate, selenite, selenium, teratogenicity, 135
γ-enolase, toluene, subacute inhalation, α-enolase, β-protein, creatine kinase-B, 109
α-enolase, toluene, subacute inhalation, γ-enolase, β-protein, creatine kinase-B, 109
ethylene oxide, prophyrin, heme, ferrochelatase, cytochrome *P*-450, 1

F344 male rats, tridiphane, atrazine, effect on pharmacokinetics, 27
ferrochelatase, ethylene oxide, prophyrin, heme, cytochrome *P*-450, 1
flame retardant, pentabromo diphenyl ether, Bromkal 70-liver metabolism, polychlorobiphenyl compounds, microsomes, cytochrome *P*-450, metabolic clearance rate, 259
furans, pneumotoxicity, nephrotoxicity, metabolic activation, 47

GABA, convulsions, cyanide, α-ketoglutarate, calcium, brain, 221
glomerulus, mesangial cell, proteoglycans, glutathione, nephrotoxicity, divalent metals, cadmium, 119
glutathione, cold-restraint, stress, non-protein sulfhydryl content, 59
glutathione, glomerulus, mesangial cell, proteoglycans, nephrotoxicity, divalent metals, cadmium, 119
glutathione (GSH), Cd^{2+} cytotoxicity, metallothionein (MT), Cd^{2+} accumulation, GSH kinetics, A549 cells, 195
GSH-peroxidase, hydroperoxides, superoxide dismutase, iron chelator, radical scavenger, diamide, 229
GSH kinetics, Cd^{2+} cytotoxicity, glutathione (GSH), metallothionein (MT), Cd^{2+} accumulation, A549 cells, 195
guinea pigs, polychlorinated biphenyls, pregnancy, sexual maturation, offspring, testosterone, postnatal growth rate, 249

heme, ethylene oxide, prophyrin, ferrochelatase, cytochrome *P*-450, 1
hepatic encephalopathy, CCl_4, phenylalanine, tyrosine, hyperammonemia, 241
hepatoma cells (rat), 12-*O*-tetradecanoylphorbal 13-acetate, cytochrome *P*-450-dependent monooxygenase activities, tumour promoters, 147
hormone deficiency, lindane (γ-HCH), cholesterol side-chain cleavage, steroidogenesis, reproductive adversity, 41
human liver, liver slices, cocaine hepatotoxicity, species comparison, pig liver, rabbit liver, rat liver and mouse liver, 171
hydroperoxides, superoxide dismutase, GSH-peroxidase, iron chelator, radical scavenger, diamide, 229
hyperammonemia, hepatic encephalopathy, CCl_4, phenylalanine, tyrosine, 241
hypothalamic-pituitary axis, oestrogen, anti-oestrogen, organ weights, uterus, liver, 185

interaction with pentobarbital, beryllium chloride, microsomal enzymes inhibition, interaction with zoxazolamine, 293
interaction with zoxazolamine, beryllium chloride, microsomal enzymes inhibition, interaction with pentobarbital, 293
ion transport, mitochondria, *N*-(phosphonomethyl)glycine, 205
iron chelator, hydroperoxides, superoxide dismutase, GSH-peroxidase, radical scavenger, diamide, 229

α-ketoglutarate, convulsions, cyanide, calcium, GABA, brain, 221

lindane (γ-HCH), cholesterol side-chain cleavage, steroidogenesis, reproductive adversity, hormone deficiency, 41
liver, oestrogen, anti-oestrogen, organ weights, hypothalamic-pituitary axis, uterus, 185
liver slices, cocaine hepatotoxicity, species comparison, human liver, pig liver, rabbit liver, rat liver and mouse liver, 171

mesangial cell, glomerulus, proteoglycans, glutathione, nephrotoxicity, divalent metals, cadmium, 119

metabolic activation, pneumotoxicity, nephrotoxicity, furans, 47
metabolic clearance rate, pentabromo diphenyl ether, flame retardant, Bromkal 70-liver metabolism, polychlorobiphenyl compounds, microsomes, cytochrome *P*-450, 259
metabolism, tri-*o*-cresyl phosphate, TOCP, chicken, delayed neurotoxicity, 13
metal, vasoconstriction, aorta, dogfish shark, cadmium, Cd^{2+}, Ni^{2+}, 275
metallothionein (MT), Cd^{2+} cytotoxicity, glutathione (GSH), Cd^{2+} accumulation, GSH kinetics, A549 cells, 195
microsomal enzymes inhibition, beryllium chloride, interaction with pentobarbital, interaction with zoxazolamine, 293
microsomes, pentabromo diphenyl ether, flame retardant, Bromkal 70-liver metabolism, polychlorobiphenyl compounds, cytochrome *P*-450, metabolic clearance rate, 259
mitochondria, ion transport, *N*-(phosphonomethyl)glycine, 205
N-(phosphonomethyl)glycine, mitochondria, ion transport, 205
nephrotoxicity, glomerulus, mesangial cell, proteoglycans, glutathione, divalent metals, cadmium, 119
nephrotoxicity, pneumotoxicity, furans, metabolic activation, 47
Ni^{2+}, metal, vasoconstriction, aorta, dogfish shark, cadmium, Cd^{2+}, 275
non-protein sulfhydryl content, glutathione, cold-restraint, stress, 59

oestrogen, anti-oestrogen, organ weights, hypothalamic-pituitary axis, uterus, liver, 185
offspring, polychlorinated biphenyls, guinea pigs, pregnancy, sexual maturation, testosterone, postnatal growth rate, 249
organ weights, oestrogen, anti-oestrogen, hypothalamic-pituitary axis, uterus, liver, 185

pathology, cadmium mobilization, chelating agents, cadmium mobilization, 73
pentabromo diphenyl ether, flame retardant, Bromkal 70-liver metabolism, polychlorobiphenyl compounds, microsomes, cytochrome *P*-450, metabolic clearance rate, 259
phenylalanine, hepatic encephalopathy, CCl_4, tyrosine, hyperammonemia, 241
pig liver, liver slices, cocaine hepatotoxicity, species comparison, human liver, rabbit liver, rat liver and mouse liver, 171
plasma DNA, cytotoxicity, toxic agents, drugs, cell death, 283
pneumotoxicity, nephrotoxicity, furans, metabolic activation, 47
polychlorinated biphenyls, guinea pigs, pregnancy, sexual maturation, offspring, testosterone, postnatal growth rate, 249
polychlorobiphenyl compounds, pentabromo diphenyl ether, flame retardant, Bromkal 70-liver metabolism, microsomes, cytochrome *P*-450, metabolic clearance rate, 259
postnatal growth rate, polychlorinated biphenyls, guinea pigs, pregnancy, sexual maturation, offspring, testosterone, 249
pregnancy, polychlorinated biphenyls, guinea pigs, sexual maturation, offspring, testosterone, postnatal growth rate, 249
prophyrin, ethylene oxide, heme, ferrochelatase, cytochrome *P*-450, 1
β-protein, toluene, subacute inhalation, γ-enolase, α-enolase, creatine kinase-B, 109
proteoglycans, glomerulus, mesangial cell, glutathione, nephrotoxicity, divalent metals, cadmium, 119

rabbit liver, liver slices, cocaine hepatotoxicity, species comparison, human liver, pig liver, rat liver and mouse liver, 171
radical scavenger, hydroperoxides, superoxide dismutase, GSH-peroxidase, iron chelator, diamide, 229
rat liver and mouse liver, liver slices, cocaine hepatotoxicity, species comparison, human liver, pig liver, rabbit liver, 171
reproductive adversity, lindane (γ-HCH), cholesterol side-chain cleavage, steroidogenesis, hormone deficiency, 41
risk assessment, contact sensitization, Buehler test, 91

salicylate, embryotoxicity, selenite, selenium, teratogenicity, 135
selenite, embryotoxicity, salicylate, selenium, teratogenicity, 135
selenium, embryotoxicity, salicylate, selenite, teratogenicity, 135
sexual maturation, polychlorinated biphenyls, guinea pigs, pregnancy, offspring, testosterone, postnatal growth rate, 249
species comparison, liver slices, cocaine hepatotoxicity, human liver, pig liver, rabbit liver, rat liver and mouse liver, 171

steroidogenesis, lindane (γ-HCH), cholesterol side-chain cleavage, reproductive adversity, hormone deficiency, 41
stress, glutathione, cold-restraint, non-protein sulfhydryl content, 59
subacute inhalation, toluene, γ-enolase, α-enolase, β-protein, creatine kinase-B, 109
superoxide dismutase, hydroperoxides, GSH-peroxidase, iron chelator, radical scavenger, diamide, 229

teratogenicity, embryotoxicity, salicylate, selenite, selenium, 135
testosterone, polychlorinated biphenyls, guinea pigs, pregnancy, sexual maturation, offspring, postnatal growth rate, 249
12-*O*-tetradecanoylphorbal 13-acetate, cytochrome *P*-450-dependent monooxygenase activities, hepatoma cells (rat), tumour promoters, 147
[^{3}H]thymidine incorporation, benomyl, carbendazim, DNA-synthesis inhibition, toxicity test, 161
TOCP, tri-*o*-cresyl phosphate, chicken, metabolism, delayed neurotoxicity, 13
toluene, subacute inhalation, γ-enolase, α-enolase, β-protein, creatine kinase-B, 109
toxicity test, benomyl, carbendazim, DNA-synthesis inhibition, [^{3}H]thymidine incorporation, 161
toxic agents, plasma DNA, cytotoxicity, drugs, cell death, 283
tri-*o*-cresyl phosphate, TOCP, chicken, metabolism, delayed neurotoxicity, 13
tridiphane, atrazine, effect on pharmacokinetics, F344 male rats, 27
tumour promoters, 12-*O*-tetradecanoylphorbal 13-acetate, cytochrome *P*-450-dependent monooxygenase activities, hepatoma cells (rat), 147
tyrosine, hepatic encephalopathy, CCl_4, phenylalanine, hyperammonemia, 241

uterus, oestrogen, anti-oestrogen, organ weights, hypothalamic-pituitary axis, liver, 185

vasoconstriction, metal, aorta, dogfish shark, cadmium, Cd^{2+}, Ni^{2+}, 275

Toxicology, 61 (1990) 317—318
